Table mat: how the sheets go together

6 sheets, 3 across x 2 down. Print at 100% / Actual size (never 'fit to page').
Each sheet has a 12 mm white margin around a grey border line with a cross at each corner.
Except on the left column, cut off the LEFT margin exactly on the border line.
Except on the bottom row, cut off the BOTTOM margin exactly on the border line.
Lay each trimmed edge on its neighbour's border line so the corner crosses meet; tape on the back.
The bottom row is the robot end (ROBOT END). +x (forward) points up the page.

A1	A2	A3
B1	B2	B3

ROBOT END (this edge goes at the robot base)

100 mm: measure this. If it is not exactly 100 mm, reprint at 100% / Actual size.
